

The Plimsoll Analysis – Global Pharmaceutical Wholesalers

A complete study of the top 470 companies in your Global industry

www.plimsollworld.com

Purpose on the analysis:

To provide leaders of major companies in the Pharmaceutical Wholesalers industry with a complete, accurate probe into how well their company, and their competitors, are performing in their Global industry.

Features of the analysis:

As this is a special edition of the Plimsoll Global Analysis it includes a host of features you will not receive in any other market analysis including:

- A full valuation** – See how your value compares to the rest of the market and spot those competitors worth less than last year
- A comprehensive performance assessment** – Compare your performance to the other 469 competitors in your market
- Written commentaries** – The analysis will tell you where each company is strong and what weaknesses they have

Your company:

Your company is featured on page 75 of the latest Plimsoll Analysis. The analysis of your company includes:

- You have been rated as a **STRONG company**
- Your company is the **194th largest in the market**
- You are the 205th most valuable company
- Your company is one of 176 to have seen their value rise

The analysis of your company is the most in depth of its kind. It will provide you with all the strategic information you need to continue to flourish in the Global industry.

The industry:

Each of the 470 major companies in the Global market has been analysed using the same model of analysis as your own company using the latest data to show:

- 61 companies have grown by more than 10%
- 237 "Strong" companies continue to be very successful
- 233 companies have improved profit margins
- 179 companies are selling more than last year
- 224 companies have seen their overall performance improve
- 34 companies are now in financial Danger
- 124 companies are carrying more debt
